CS 225 Team Contract

Communication
1. **Team Meetings** Meetings will be held every Saturday from 3-4pm (CST). We will use Discord for communication. Meeting notes will mostly just consist of Discord text channels.
2. **Assistance** We will contact each other via Discord and texting. Responses will generally be received within 12 hours.
3. **Respect** During meetings, we will create an open and honest environment. All members will be encouraged to voice their opinions in a judgement free and respectful environment.

Collaboration
1. **Work Distribution** We will assign work using Github's Issues page. We will address unforeseen complications by using an ancient ritual of work distribution known as "not it/nose goes". In the event that there is a tie, it will default to Adarsh, as he has a lot of strengths, including his big appetite - for knowledge - and food. He has a "strong ability to orchestrate solutions when there is conflict" (Adarsh et. al 2020).
2. **Time Commitment** We will accommodate one hour per meeting, 2-3 hours per member throughout the week. We all have pretty busy schedules, which is why we chose to meet on weekends. We are all aware of the time commitments of each member and will be respectful of one another.
3. **Conflict Resolution** We will solve conflicts by hearing the viewpoints of both sides and using majority vote. Ties will be decided through Super Smash Bros Ultimate 1v1, Final Destination, no items, FS Meter off, best of three, random only. If we find that a member is not doing his or her work, they will be held accountable at the next meeting.
